Summary

Junior Full Stack Developer with 1+ year of paid experience building and shipping web apps with React, Next.js, TypeScript, and FastAPI/PostgreSQL. Delivered client landing and sales pages, contributed to an insurance claims platform, and built a deployed full-stack inventory app. Comfortable owning tickets end to end on remote teams.

Skills

Languages: TypeScript, JavaScript, Python
Frontend: React, Next.js, TypeScript, Vue.js, Tailwind CSS, React Query, HTML/CSS, web accessibility
Backend and data: FastAPI, REST APIs
Database & ORM: PostgreSQL, Supabase, Alembic
Automation: n8n, Zapier
Tools: Git/GitHub, Jira, Vercel

Projects

TallyBook | React JS, FastAPI, SupaBase, Alembic | Automation (n8n) | **https://tallybook-sigma.vercel.app | https://github.com/jp-o-git/tallybook**

- Built a full-stack inventory website for small businesses to manage products and monitor stock levels.
- Designed the REST API in FastAPI and the Supabase (PostgreSQL) schema with Alembic migrations; deployed the application online.
- Built an n8n workflow for a daily sales report (total sales, restock needs, best sellers), demoed locally.

Health Sphere Landing Page | Vue Js, SupaBase | https://github.com/jp-o-git/health-landingpage | **https://health-landingpage-one.vercel.app**

- Built a responsive healthcare landing page in Vue and Tailwind with service sections, FAQs, and CTAs.
- Improved load performance with lazy-loaded images and custom typography and branding.

Experience

Frontend Developer (Freelance) | Lion Sales Funnel (Remote) | Oct 2025 to Oct 2026

- Built and deployed 5 client landing pages in React and Vue, including one reusable design adapted into 3 client sites by swapping content only, each delivered against fixed launch deadlines.
- Built a Kajabi sales page and a workshop replay page for a client launch, matching the client's requested UI and brand guidelines.
- Built a recruiting application form in Next.js with input validation and a quiz with a score result, submitting responses directly to the company's database.
- Handled manual QA and bug reporting, and edited website graphics in Canva.

Full Stack Developer | Ally Public Adjusting (Remote, Contract) | Jan 2026 to Aug 2026

- Built React UI components, workflows, and API integrations, and wrote the database queries that fetch extracted claim data (such as date of loss) for display in the frontend.
- Improved the backend extraction pipeline, raising text-extraction accuracy from ~85% to ~96% word-level F1 across 97 test documents by debugging and refining extraction logic.
- Removed duplicate extracted content by ranking extracted tables by size and checking whether larger tables already covered smaller snippets.

Internships

- Software Engineer Intern | Hooli Software | June to September, 2025: Improved website accessibility by implementing keyboard navigation and screen-reader labels for a wider range of users
- Software Engineer Intern | Hooli Software | August to October, 2024: Delivered pixel-accurate UI changes and bug fixes in React and Tailwind CSS from design specifications

Eligibility

- Civil Service Professional Examination Passer – March 2025

Education

Bachelor of Science in Computer Engineering
Polytechnic University of the Philippines, Santa Maria Bulacan Campus
2020 to 2025
